

Hi guys, Well I wanted to do another pic with my Fantroll Handia since I havent done one in a while.

🤔 In this picture, Handia is outside in nature with an extremely large blue glowing Crystal with many facets, And shes thinking about weather she will touch the Crystal, because it is very powerful and has strong hand growing powers, and her hands are allready large with long and bony fingers from Crystals. Well, I spent a lot of time on the Shading in this pic because I wanted to make it look nice, So I hope you like it. And, I also put this as a Print because someone asked me to put some of my art as prints. So if you want it, You can buy it and put it on your wall or anything. Well, I had fun doing this pic and I hope you like it. 🤔

Hi guys, This is just a picture of me with my Homestuck OC Fantroll Handia. 🤔 In this picture, I am in the Hospital with sickness and I am being treated with Crystals to heal my disease which a side effect is that my Hands are growing long and large with long bony fingers. I am being treated with Crystal IV in my hand and through the Central line in my neck with green and blue crystal solutions and as well I have the Pulse oximeter on my finger and the EKG leads on my chest to show my heart rate and oxygen on the Monitor, As well as the mask to deliver Crystal air to my lungs and the catheter. Finally, Handia who is the doctor in the Hospital is going to give me an Injection of pink crystal solution as the final treatment for my illness, And I am crying because I am sick and I do not want my hands to grow any more. Handia has her Hand symbol on her doctors coat and she is wearing nice Blue nitrile gloves on her fairly long hands, Well, I hope you like this 🤔

Hey everyone, Just a quick Picture I wanted to draw here. 🤔 In this picture I am very sick and in the Hospital and my Homestuck Fantroll Handia is the doctor. To treat my illness I have Crystal IV in my neck and hand which are causing my Hands to grow large as a permanent Side effect which you can see in the drawing. And Handia also had this treatment before which you can see because of her nice, long Hands but now she is cured, Well I am too sick to eat in the Hospital here so i have a Nasogastric tube that goes from my nose into my stomach, And Handia is using the syringe to delevor food to my stomach so that I don't get sicker and I am crying because the Tube hurts and it feels uncomfortable and because Im embarrassed, Well I hope you enjoy this new pic i did or think its an interesting Plot idea. 🤔

Hey guys, Just a different kind of Idea that I had here. 🤔 In this picture I am in the hospital for Illness and I am receiving Crystal treatment with Crystal IV in my hand and the central line to deliver Crystals to my bloodstream which is causing my hands to grow long and bony with long Fingers and prominent joints, and I am crying as well as the EKG leads connected to the Monitor and the cateter. Also In front of me, You can see the meal tray with a typical Meal in the hospital which is 3 slices of Roast beef, some Mashed Potatoes and peas, carrots, corn as well as Orange Juice on the side. And my Homestuck OC Fantroll Handia is here and brushing my teeth for me because I am too sick to do it. She is a Doctor in the hospital and she is brushing my teeth with the Toothbrush in her large hands.

I hope you enjoy this new Pic from me. 🤔

*Handia's hands are growing due to the small, blue diamond type Crystal and IV.*

Hi guys, This is just another Origin Story of my Homestuck OC Handia and how she got her very large Hands. The story is that Handia had an illness and she went to the Hospital, where the treatment for her disease was to use Crystal IV in her veins and touch this small, light blue symmetrical Crystal. She has to touch the crystal in order to heal the illness and as a side effect it causes her Hands to grow larger, with long, thin Fingers and boney joints. This is how Handia got her quirk which is her long and large hands. I hope you like this new Picture. 🤖

Hey guys, I just thought I would draw another pic of my Fantroll Handia. 🤖 This time she is in the Hospital, and for her treatment she is going to touch this pink medium size diamond shape Crystal. This will cure her but the side effect is that her fingers will grow long, with prominent joints and very bony. Which you can see in this picture, Her hands are becoming quite long and large from the crystal.

I hope you like this pic 🤖

Hi guys, Sorry i didnt upload as much stuff lately but this is just a pic of my Homestuck Fantroll Handia, in a nice nature area, with a Tree, grass and a blue sky. She is holding a blue, medium large

size crystal which is causing her hands to grow. I just wanted to draw a nice picture with Nature in it because its spring now, It's really warm and pretty and Roger and I are going to see the birds soon

😊. I hope you like this picture.

Hi guys, This is just a picture I wanted to make to comemorate getting 100 Watchers on my DA. 🥳  
The picture is me and my Fantroll Handia having a party to celebrate. She has a Gift and there are crystal balloons and we are holding hands and smiling. I just made this picture for my followes to show how happy I am, that people appreciate my Art and I hope you enjoy looking at it a lot, It makes me really happy when people like my art. Thank you guys so much. 🥳

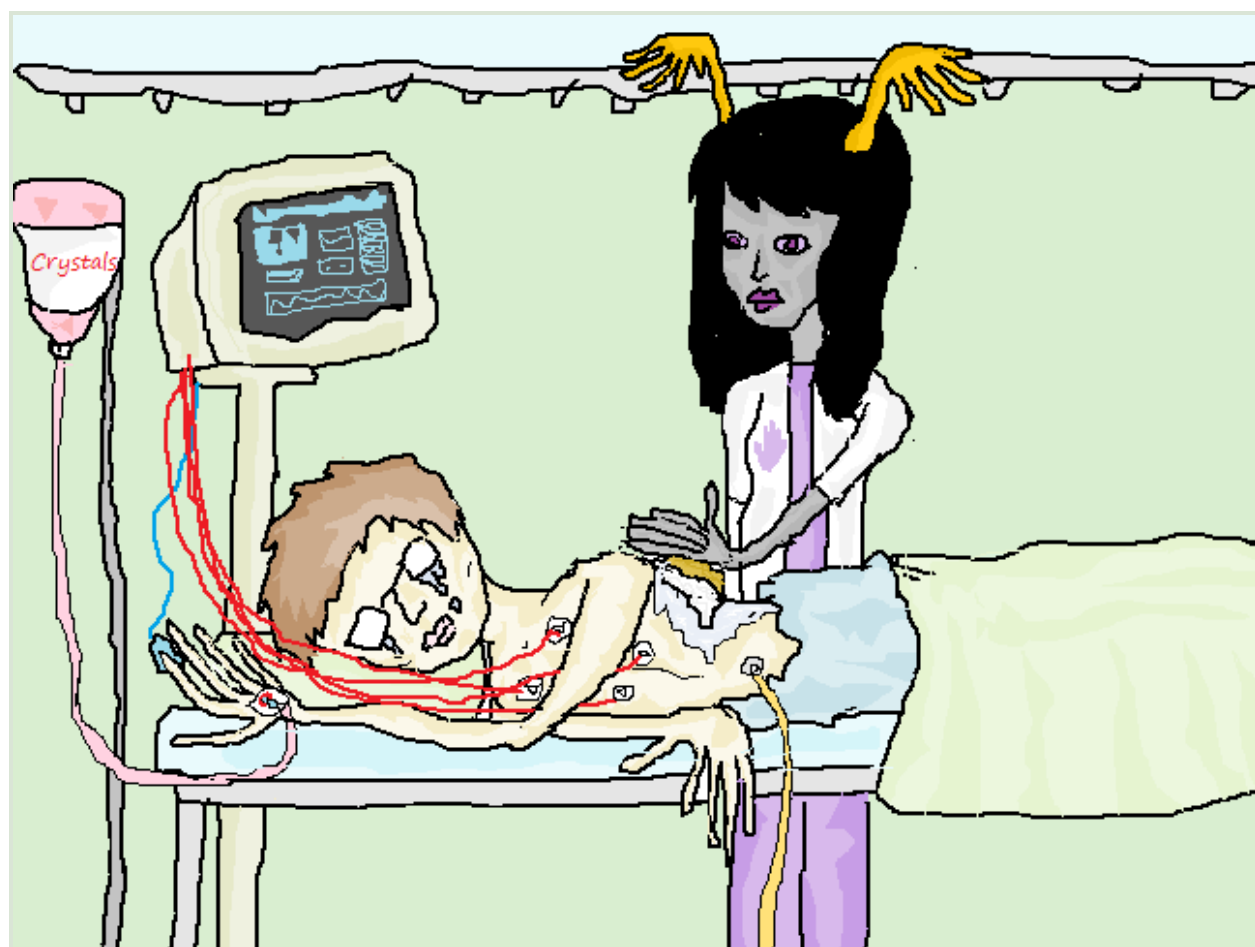

Hi guys, This pic is kind of different from the ones I normally do but I wanted to do a nice pic of my Homestuck fantroll Handia looking pretty like in a Glamour portrate or something like that. So here you can see Handia in a room with a nice couch, And shes wearing a pretty dress and showing off her Hands which are long and skinny with painted nails. I hope you enjoy this picture 🥳

Hi guys, this is just a quick picture for Dimitri, My friend who likes Denim... I wanted to draw another pic for him and I decided to use my Homestuck OC Handia this time. Well you can see she is wearing a full denim outfit in this pic but also with her symbol, the purple Hand on her pocket. Hope you enjoy

Hey everyone, This is kind of a complicated drawing but it's an idea I had with me and my homestuck Fantroll Handia. The drawing here is me, I am sick and in the hospital as you can see, And the treatment for my disease is Crystal IV with a feeding tube of crystals to my stomach to heal me, which as a side effect is making my hands grow quite big with long fingers. I also have electrodes on my chest to monitor my heart and Pulse Oximeter for my lungs. Well, When you're in the hospital and you can't get out of bed you need to bathe still. So sometimes the doctors will give you a sponge bath, and in this picture my Homestuck fantroll Handia who also has large hands is doing this to me. I hope you like this pic. 🤖

Ok.. So I always wanted to do an animation for a long time now But I hadnt tried for a while because it was too hard, Well I did it now and I hope you like it 🍷 This is a very simple animation, and I know its not that good but I havent practiced Animation a lot, But its just an animated version of how my Fantroll Handia got her very large, long hands with thin long Fingers. If you dont know the backstory, Handia was sick so she went to the hospital where they healed her with a Crystal. But the

crystal also makes her hands grow very large. I forgot to draw in her horns in here ): But I really wanted to post this animation here anywa.y I hope you enjoy it.

Just another Idea I had here. Im in the hospital because I'm sick, And the treatment is to touch this very large, light purple Crystal which makes my hands grow longer. My Homestuck fantroll Handia is here also and shes watching me as I cry.

Hi guys, I havent been drawing as many pictures lately because I've been Depressed but here's a picture Ive been wanting to draw for a long time. It's just the backstory for my fantroll, Handia on why her hands are so large, long and bony.

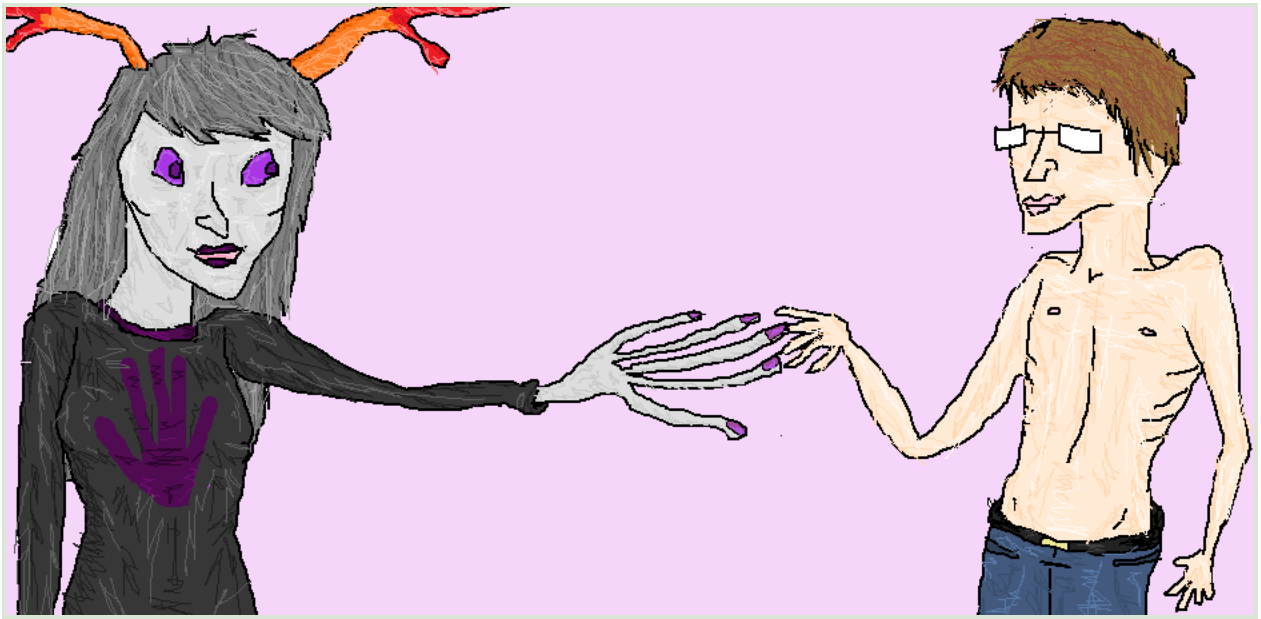

OK, This is a quick drawing/sketch of Another idea I had. It is if my homestuck character Handia was a doctor in the hospital and she was taking care of me if i was sick, As you can see i have the Crystal IV and the Crystal air tube which is making my hands grow very long and large, like Handia's , but not as

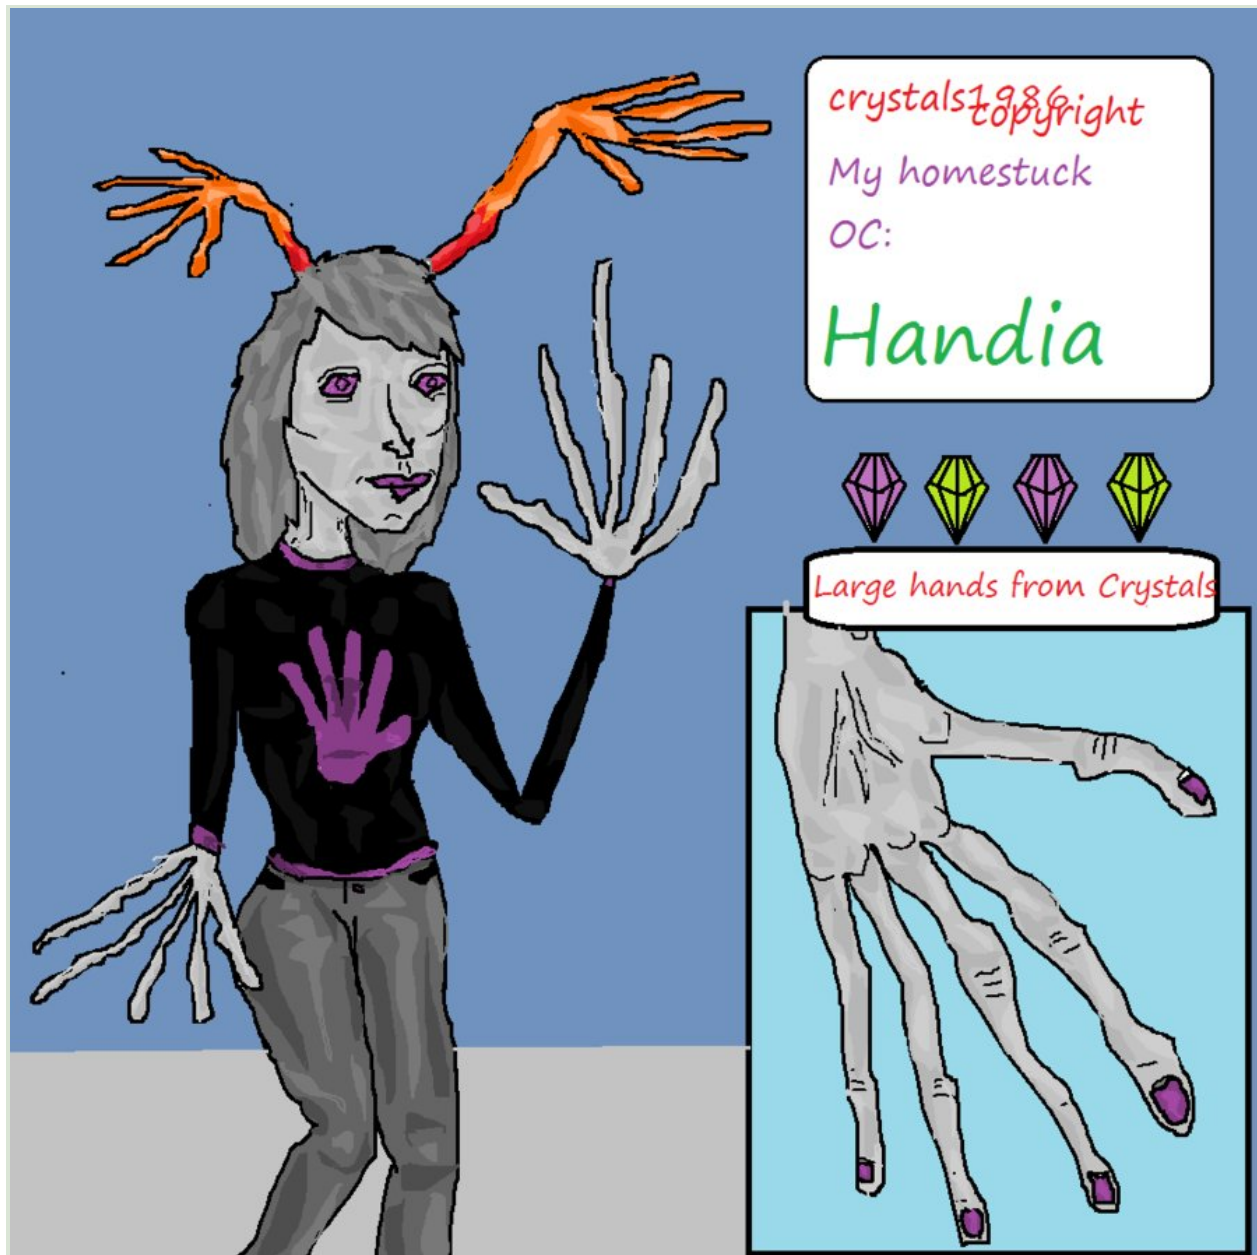

big yet. Also the catheter because I am sick. And I am crying because Handia wants me to take the crystal for a treatment to get better, but i dont want my hands to get any bigger.

OK, In this picture my homestuck OC fantroll Handia is touching a very rare Pyramid Crystal which has the ultimate hand growing powers. And you can see because her hands are growing Very long and large, they are actually some of the longest and largest hands which I have drawn. 🤖

Ok, So this is a drawing of me and my homestuck fan troll whose name is Handia, you can see her back story and things in my original drawing in the Gallery. This is a drawing of what could happen if Handia and me met in real life, and in this picture Handia is letting me touch her beautiful long hands with mine which are in real life very Small so i drew it like that in the drawing too. This is me trying a more realism kind of style.

I didn't like Homestuck before but I saw some good art of it on here and my friend convinced me to read it, well , I found out it was really good and so I made a homestuck troll oc. This is my OC and she is named handia, her horns are shaped like large hands and she has a hand on her shirt and of course Very large hands with long bony fingers : )) Her story is, she has an illness and has to be in the hospital for a lot of time. The doctors are looking for a cure for her so they had to get speical Alternian crystals that they heard have the power to cure people. But the Crystals have weird powers and they

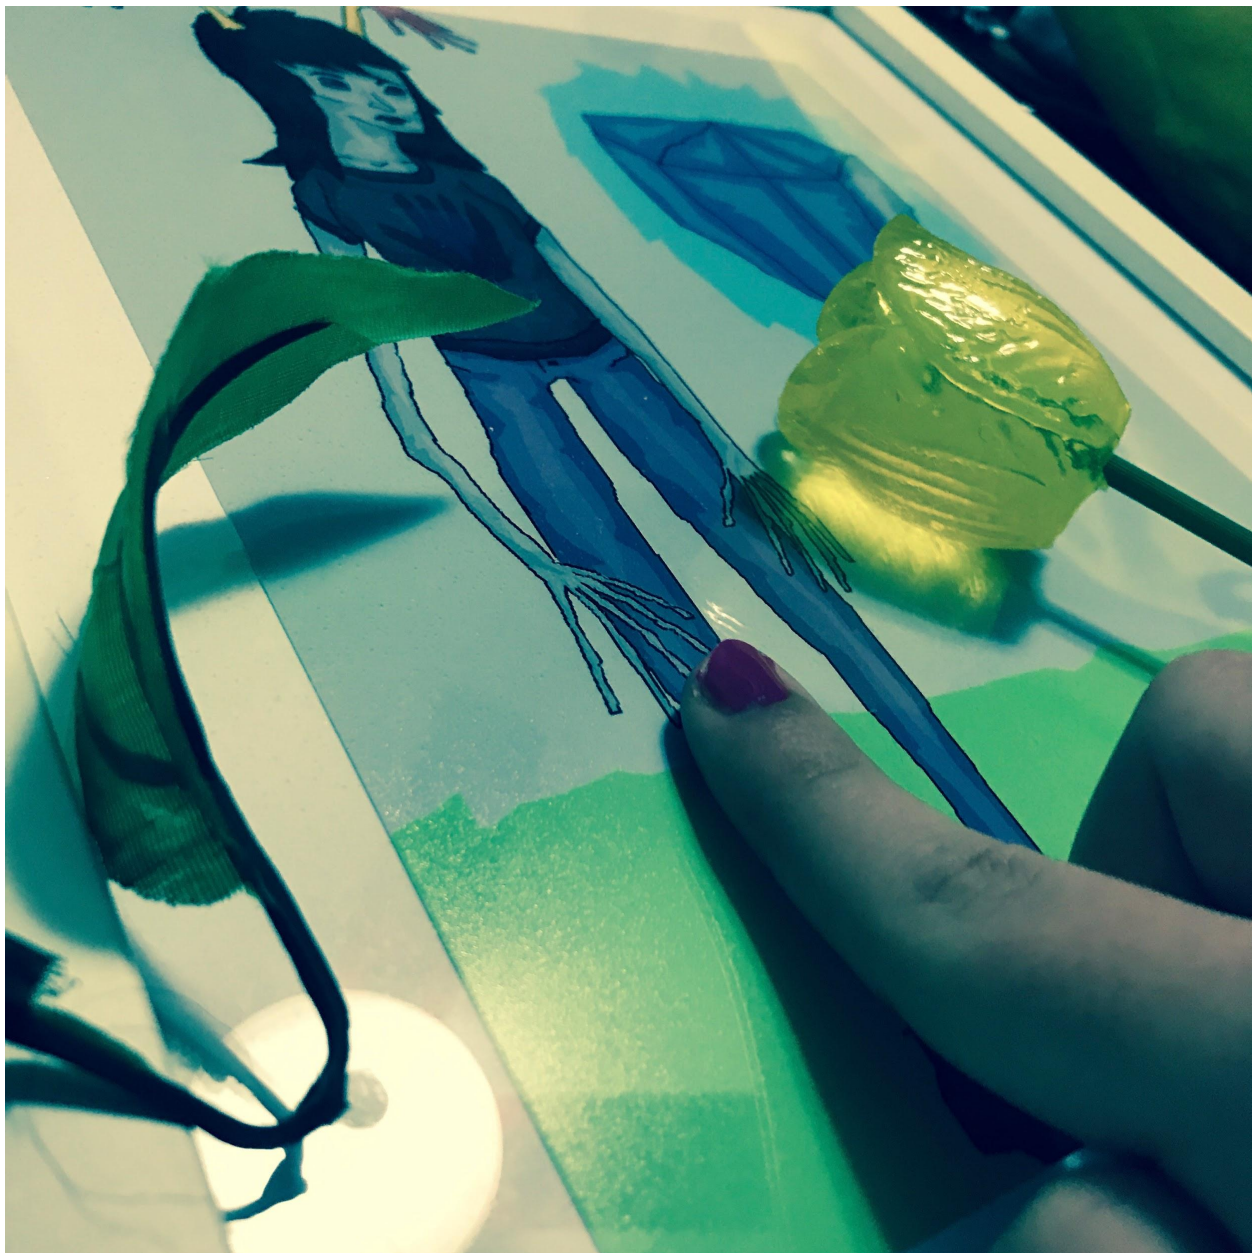

make her hands grow large, and odd looking, and even though the doctors try things to stop this they can't find a treatment to stop the new hand growth. Or the sickness because she is still sick, and she has to keep touching the crystals not to get more sick but it makes her hands grow even more each time, As you can see her hands are very large right now. But she is learning to live and have life differently with her gigantic hands and fingers which are her quirks.

rip

2013-2017

We will always remember you and the laughs your wonderful works of art have given us.  
Until we meet again, Damien.
